

The Prevention of Hantavirus Disease

Air out closed buildings 1 hour. Disinfect places rodents have been, then clean up.

Repair screens and holes or cracks in walls.

Wear rubber gloves. Trap and disinfect rodents.

Disinfect and clean up rodent nests and droppings.

Put materials in 2 trash bags; throw away, burn or bury.

Formula for Disinfectant Solution:

1 and 1/2 cups of chlorine bleach to every gallon of water. Or use household spray disinfectant.

For more information, call your state health department. Or call CDC toll-free at 1-877-232-3322.
