Purpose and Intent

This document provides a set of design guidelines for public and private projects in and around Main Street in Bridgeport. These guidelines provide a basic "road map" for Bridgeport's ongoing revitalization and are supplemental to the 2013 Main Street Revitalization Plan.

For private property owners, the intent of this document is to establish a flexible palette of design techniques and approaches that can assist with building renovations and new construction projects and ensure a positive contribution to Bridgeport's character. Private realm elements include the following:

- Building Massing and Site Definition;
- Building Frontage;
- Building Façade Elements; and
- Suggested Materials and Colors

For Mono County and other agencies involved with improvements to the public realm, this document p rovides a suggested palette of design elements that can improve the pedestrian experience along Main Street and build upon the community's established character. Public realm elements include the following:

- Streetscape Elements;
- Curb Extensions and Strategies; and
- Signage and Wayfinding

Part of the community's character comes from the individuality present among properties. Buildings in Bridgeport follow a diverse range of styles, but two styles are most prevalent in the community:

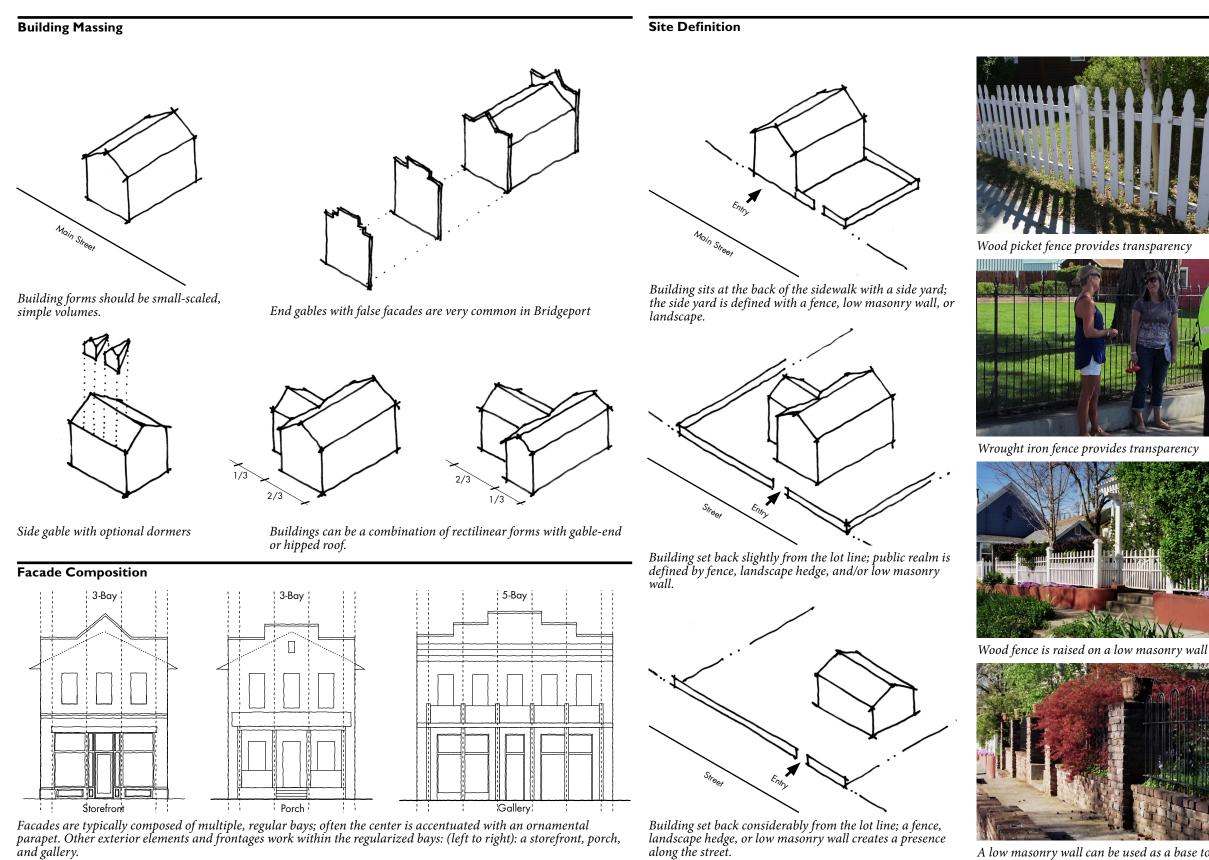

- Colonial Revival / Early 20th Century: Buildings characterized by traditional compositions and massing, symmetrical and orderly composition of openings, and simple, traditional exterior details in wood, stone, and stucco
- Mid-Century Modern / Roadside : Buildings and elements characterized by horizontal proportions with vertical accents, streamlined exterior details, and playful signage and colors

Property owners and County staff should work together to maintain this architectural diversity among properties, in order to preserve Bridgeport's unique identity. The suggested design guidelines that follow hope to balance this individuality with elements that can encourage and create a cohesive identity.

Applicability

Design features described in this manual may require additional coordination and compliance with existing county and/or state regulations prior to implementation. Interested parties should always check with the appropriate agencies (such as Mono County Planning and/or Caltrans) for guidance regarding project permitting and approval.

Building Massing and Site Definition

A low masonry wall can be used as a base to create a taller fence

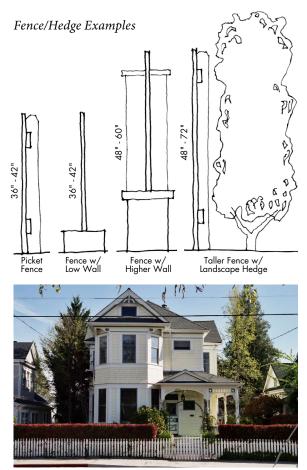

Opticos Design, Inc. Design Idea Book ©2013 Opticos Design, Inc. **Community Development Department of Mono County**

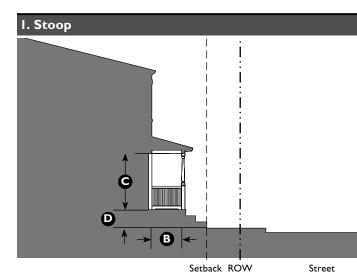

A hedge combined with a fence provides additional privacy and visual interest

This low wall helps define the street, while also providing a public bench and a private terrace for diners.

Building Frontage Types

Setback ROW Street

Key ---- ROW / Property Line ----- Setback Line

Description

Stoop: The main facade of the building is near the frontage line and the stoop should be elevated above the sidewalk to ensure privacy within the building. This type is appropriate for residential uses with small setbacks.

Size		
Width, Clear	5-8' typ.	۵
Depth, Clear	5-8' typ.	B
Height, Clear	7-8' typ.	G
Height	l story	
Finish Level above Sidewalk	12" min.	D
Miscellaneous		

Stairs may be perpendicular or parallel to the building facade.

Ramps should be parallel to facade or along the side of the building.

The entry door should be covered or recessed to provide shelter from the elements.

Stoop at the zero-lot line

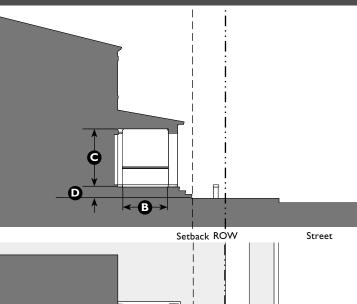

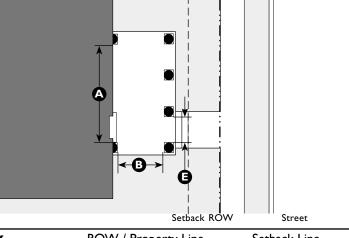

Stoop with deeper setback from the lot line

2. Porch

Key _--- ROW / Property Line _---- Setback Line

Description

Porch: The main facade of the building is setback from sidewalk or road. The resulting front yard is typically very small and can be defined by a fence or hedge to spatially maintain the edge of the street.

Width, Clear	10' min. typ.	4
Depth, Clear	7' min. typ.	B
Height, Clear	7' min. typ.	Θ
Height	I-2 stories	
Finish Level above Sidewalk	12" typ.	D
Path of Travel	3' wide min.	B

Porches are open on three sides and have a roof.

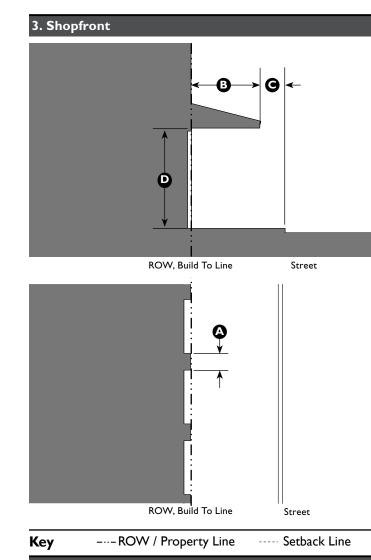

A porch on Main Street

Engaged porch at the Bridgeport Inn

Building Frontage Types (continued)

Description

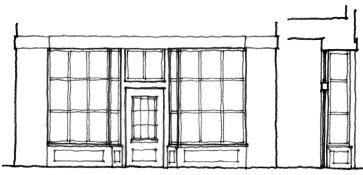

Shopfront: The main facade of the building is at or near the frontage line with an at-grade entrance along the public way. This type is intended for retail use. It has substantial glazing at the sidewalk level and may include an awning that may overlap the sidewalk. It may be used in conjunction with other frontage types.

Size		
Distance between Glazing	2' max. typ.	۵
Ground Floor Transparency	50% min.	
Awning		
Depth	4' min. typ.	B
Setback from Curb	2' min.	Θ
Height, Clear	8' min.	D
Miscellaneous		
Residential windows shall not b	e used.	

Operable and open-ended awnings are encouraged.

A storefront with a recessed entry

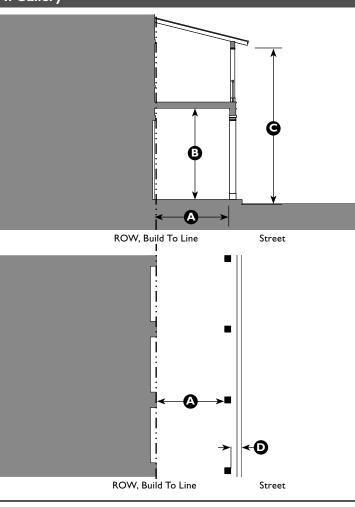

A storefront with an angled entry and divided lites

Storefront with a flush entrance and awning on Main Street

4. Gallery

---- ROW / Property Line ----- Setback Line Key

Description

Gallery: The gallery element overlaps the sidewalk. This type is intended for buildings with ground-floor commercial uses and may be one or two stories. The gallery should extend far enough from the building to provide adequate protection and circulation for pedestrians and extend close enough to the curb so that a pedestrian cannot bypass it.

Size		
Depth, Clear	8' min. typ.	A
Ground Floor Height, Clear	10' min.	B
Height	I-2 stories	G
Setback from Curb	2' min.; 3' max.	D
Miscellaneous		

primary circulation requirements.

Galleries should have a consistent depth along a frontage.

Gallery must project over a sidewalk.

Two-story gallery

Building Facade Elements

Windows and Doors

Vertically proportioned windows: 6-over-1 window pane; 2-over-2 window pane

Vertically-proportioned ganged windows allow for a wider opening

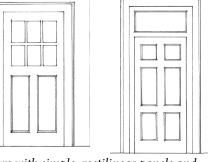

Simple Shopfront Renovations

Windows are multi-paned with true or simulated muntins

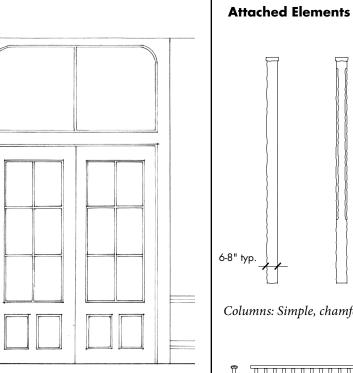

Box window projects from the building

Doors with simple, rectilinear panels and windows

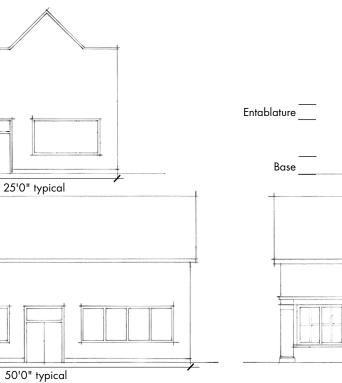

Storefront entry through paired doors

glazing

Narrow example: Character is improved by simply adding a base below the windows and an entablature above; two pilasters frame the corners; the windows are divided into three vertically- proportioned ganged windows.

Wide example: Character is enhanced by framing the ganged windows with pilasters supporting an entablature that runs the length of the storefront; the windows sit on a base and are articulated with muntins; the doors are paneled.

Design Idea Book **Community Development Department of Mono County** Storefront door with transom, panels and

Awning details

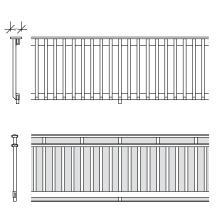

Columns: Simple, chamfered, with imposts

Details of railing types

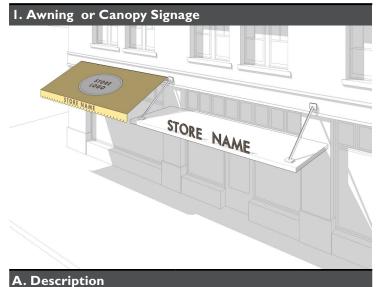

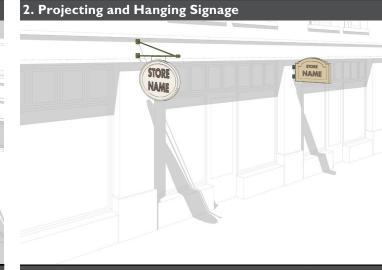

Canvas awning; ideally retractable for more sunlight in the winter months.

Pedestrian-Scaled Signage

Awnings are a traditional shopfront fitting and can be used to protect merchants' wares and keep shopfront interiors shaded and cool in hot weather. Retail tenant signs may be painted, screen printed, or appliquéed on the awnings.

A. Description

Blade signs mount perpendicular to a building's facade. They are typically hung from decorative cast or wrought iron brackets or from the underside of beams or ceilings of a gallery, arcade, or similar covered area. They are typically hung in a manner that permits them to swing slightly. These signs are small, pedestrianscaled, and easily read from both sides. Often, a blade sign offers the opportunity for a more creative or "playful" sign. Blade signs shall be hung well out of reach of pedestrians and all exposed edges of the sign shall be finished.

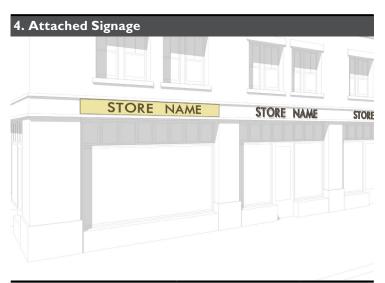

3. Window Signage STORE STORE TORE NAME

A. Description

Window signs are professionally painted, consisting of individual letters and designs or gold leaf individual letters and designs, and are applied directly to the inside of a window. Window signs offer a high level of craftsmanship and visibility, and are often used for small professional offices. Window signs are often repeated on storefronts with several divided openings; however, repetition should be done with great care to ensure that the entrance to the business is clearly distinguished.

Opticos Design, Inc. Design Idea Book Community Development Department of Mono County ©2013 Opticos Design, Inc.

A. Description

Wall signs are flat against the facade consisting of a single panel with raised letters, individual cut letters applied directly to the building, or painted directly on the surface of the building. Wall signs are typically placed directly above the main entrance and often run horizontally along the "expression line" or entablature of traditional buildings. Wall signs do not protrude beyond the roof line or cornice of a building. Wall signs are typically intended to be seen from a distance and are often accompanied by additional pedestrian-scaled signage.

Suggested Materials and Colors

Materials	
Cladding	Predominantly siding in wood, composition
	board, or fiber-cement board with horizontal
	shiplap, beaded lap, or beveled profile. Vertical
	board and batten siding may also be used in 12-
	16" widths. Vinyl and T-111 siding are strongly
	discouraged. Corrugated metal should be used
	sparingly.
Foundations	Brick, stone, cast stone, painted concrete, or
	stucco.
Roofing	Building and porch roofs may be a built-up
	membrane (flat roofs only) composition shingle,
	wood shake, slate, or corrugated or standing
	seam metal.
Windows	Wood, aluminum-clad wood, or vinyl. Glass
	should be clear and non-reflective.
Doors	Principal doors in wood, aluminum-clad wood,
	vinyl-clad wood, factory-painted aluminum, or
	fiberglass.
Storefronts	Wood, aluminum-clad wood, or metal frame
	with simulated or true divided lites. Glass should
	be clear and non-reflective.
Trim	Wood, composition board, fiber-cement board,
	and molded millwork for built-up sections. PVC
	trim is discouraged. For soffits and porch ceilings,
	GWB, plaster, T&G wood, exposed rafters,
	or composite. Continuous perforated soffit
	materials and the use of vinyl panel systems are
	strongly discouraged.
Gutters	Half round or ogee-profile metal. PVC is strongly
	discouraged.
Downspouts	Round or rectangular metal. PVC is strongly
	discouraged.
Columns	Wood, fiberglass, steel, or composite. Column
	bases may be brick or cast stone.
D :1:	Milled-wood top and bottom rails with square
Railings	······································
Kallings	balusters in wood, or wrought iron. PVC trim is

Materials (co	ntinued)
Chimneys	Common brick, stone, cast stone, stucco, or
	metal stovepipe.
Signage	Painted wood or metal are encouraged.
Colors	
Cladding	Siding is typically white, off-white, cream, grey-
	green, grey-blue, brick-red, light yellow, or
	natural wood. Brick may be red or additional
	natural colors.
Roofing	Standing seam metal roofs are typically natural,
	black, brown, red, or dark green finish. Roof
	shingles are typically natural wood, dark grey or
	black.
Windows	Sashes and frames are typically dark stained or
	painted white, off-white, cream, dark red, dark
	green, or dark blue. Shutters may be painted to
	match sash/frame color.
Trim	White or off-white.
Gutters/ Downspouts	White, off-white, painted dark green or dark red.
Columns	White or off-white.
Railings	Wood railings dark stained or painted white or
	off-white. Wrought iron grilles and rails should
	be painted black.

White (B. Moore CC869 or similar) Off-white (B. Moore HC27 or similar) Cream (B. Moore HC6 or similar) Lt. yellow (B. Moore 290 or similar) Grey-green (Moore HC114 or similar) Brick-red (B. Moore HC50 or similar) Suggested Window Sash and Frame Colors Dk. green (B.Moore HC135 or similar) Dark red (B. Moore 1295 or similar) Dark blue (B. Moore HC156 or similar)

Benches

DuMor 58 series bench

Contemporary

Plainwell[™] Specifications

The Plainwell bench is available with seats constructed of aluminum or wood The aluminum end frames on the wood bench and the all aluminum bench may be specified with Pangard II® powdercoat in standard colors; optional colors available for an upcharge. Available in two lengths, the 72" and 96" bench may both be specified with a center arm. The 96" bench may also be specified with 2 intermediate arms, placed at equal intervals. Freestanding/surface mount support is standard.

center arm center arm

Finishes

Interior woods are finished with Landscape Forms' exclusive LE-80 wood finish, a clear, catalyzed acrylic catalyzed acrylic lacquer.

Exterior woods are unfinished and will weather to a soft pewter gray, requiring no future maintenance.

Metal is finished with Landscape Forms' proprietary Pangard II® polyester powercoat, a hard yet flexible finish that resists rusting, chipping, peering and fading. Call for standard color chart. A wide array of optional colors may be specified for an upcharge.

To Specify

LENGTH OPTIONS 6' BENCH 8' BENCH

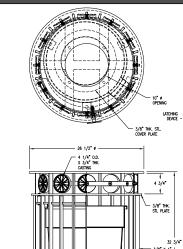

Bench: Select Plainwell bench, 72" or 96" length, wood type or aluminum seat and powdercoat color. Specify with or without center arm or intermediate arms for 96" bench.

Litter Receptacle: Select Plainwell litter, wood type or aluminum side panels, powdercoat color. Specify top or side opening; if side opening is specified, select with or without sand pan.

Bicilínea: Bike racks available in 10' and 20' lengths. 10' accommodates 8 bicycles, and 20' holds 16 bicycles. Stainless steel horizontal tube connects to support posts and curved tubes. Bicilinea must be embedded, and needs some assembly.

Landscape Forms Bicilinea bicycle rack

Curb Extensions

Curb extensions extend the sidewalk into the parking lane, thereby calming traffic by visually and physically narrowing the roadway, and reducing the distance a pedestrian has to cross the street. Curb extensions are also a great public amenity, as they create more space for landscaping and streetscape features, and they provide a place to experience or build a community identity.

Because it can take time and money to install a new curb line, there are many creative solutions for temporary curb extensions. These can be removed daily, or seasonally in winter.

Normally, curb extensions are found at the end of a block, utilizing space too small for an additional parking space. They can also be extended to occupy 1-2 parking spaces. The width of a curb extension is typically the parking lane width (seven to eight feet for parallel parking, 16-18 feet for diagonal parking). As shown here, curb extensions also exist mid-block for outdoor seating or community amenities.

Temporary Curb Extension

Mulch is used to designate a temporary extension for cafe seating (Photo courtesy of: http://parkingday.org/frequently-asked-questions/)

Carpet squares, haybales, and sod create a parklet for National Parking Day (Photo courtesy of: http://blogs.riverfronttimes.com/dailyrft/2011/09/parking_day_st_louis_olive. php)

Installed Curb Extension (Short Term)

Flower planters create a removable curb extension
